

# DJ Power V-2 SPARK

**waterfall" Fireworks effect  
without gunpowder**

**no dangerous materials - for  
indoor use**

**environmentally friendly  
without smoke and odor**

**per powder filling up to 18min  
effect**

**up to 4m fall height**

The Spark V-2 by DJ Power is the second version of Spark V-1, specially developed for overhead mounting. Due to special granules the Spark V-2 can produce sparkling fountain that fall down up to 4 meters. These sparkling fountains are much cooler than traditional pyrotechnics by heating the specially formulated DJ Power granules and therefore can be used in- and outdoors. Due to this unique feature the Spark V-2 can be used in many different settings, such as a wedding, a gala event, a festival or even a theatre.

To ensure maximum safety during operation, the Spark V-2 automatically shuts off after 30 seconds of continuous ejection and can then be reactivated. In order to use the Spark V-2 you are restricted to use the DJ Power granules. It comes with a special key card that unlocks the device for use.

The Spark V2 is controlled via DMX512 (3pol XLR) or by ...

## Power supply

Power consumption max 600 W

## Functions

LC Display Yes  
Wireless Control Yes

## Connections

Current in P-Con  
Current out P-Con  
XLR in/out 3 pin

## Controlling

DMX512 Yes  
Number of DMX channels

## Technical Data

Ejection volume 4m fall  
Warm-up time 3 min

## Hardware

Dimensions (L/W/H) 228 x 206 x 227 mm  
Weight 7,5 kg
