

bubble machine P-1000Y

two bars for bubble production

potentiometer for lift control

high output projection up to
8m and up to 4m height

DMX512 (3pol)

Including wireless controller
(25m range)

The POPO-1000Y with dual wands and fans creates enormous quantities of big bubbles while also creating an updraft allowing the bubbles to rise high in the air. Plastic fluid tank prevents corrosion and leaking. Handles and built-in wheels make transport easy.

Power supply

Voltage	AC 220V-240V 50/60Hz
Fuse	0,5 A
Power consumption max	60 W

Connections

Current in	IEC
XLR in/out	3pol

Controlling

Remote control	Yes
Frequency of the remote	315 MHz
DMX512	Yes
Number of DMX channels	3

Technical Data

Effect type	Seifenblasen
-------------	--------------

Hardware

Dimensions (L/W/H)	434 x 384 x 405 mm
Weight	13,00 kg
