

PAR 56 ACQUA+lux for swimming pool

Code: PR#08120002

ACQUA+lux (PAR56 SWIMMING POOL)

Acqua + lux is able to ensure all the lighting power that your swimming pool needs. The practicality and durability of materials assure the maximum level of reliability, while the patented structure makes it completely free of any infiltrations. The par56 for swimming pool operates at 12Vac with electromagnetic transformers, which are included in the lighting system of your pool, if sealed with a bi-component gel certified Ip68. The lamp has the Ip68 certificate as well.

Also available in RGB with centralized remote control.
Product designed and manufactured in Italy.

Accessories:

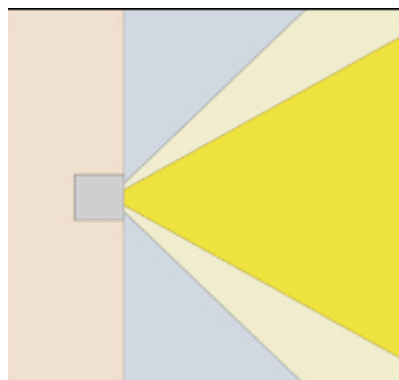

Transformer 220Vac/ 12Vac 300W

Transformer 220Vac/ 12Vac 50W

Bi-component insulating Gel 1000ml

Bi-component insulating Gel 60ml (for a lamp)

TECHNICAL SPECIFICATIONS	
Input voltage	12 - 15 Vac
Frequency	50-60 Hz
Electricity supply	2,5 A
Power consumption	30 W
Material	Polycarbonate
Dimension	Ø 178mm h = 65mm
Weight	0,35 Kg
Electricity connection	2 x screws M4
Protection level	Ip68
Using temperature	-10 °C - +40°C
Insulating class	III class
Beam angle	90°
Dimmerable	NO
Source	9 leds high lighting CREE
Colour temperature	5500K - 7000K
Total emission	1800 lm
Brightness	520 lux @ 1 meter
Impact resistance	Ik07 2.00 Joule
Installation advice	1 x 18mq

Colour temperature 6500K
