

VPS SERIES

The American Audio VPS Series microphones were designed with singers, MC's and anyone who wants a good quality mic at a fair price in mind. Each VPS series mic has been acoustically tailored to outperform competitively priced microphones. From the least expensive VPS-20 to the VPS-80, our mics feature Cardioid and Supercardioid patterns for better feedback rejection while still retaining crystal clear audio properties in order to achieve higher gain levels before feedback. Great care has also been taken when designing the mic capsule, suspension and the barrel in order to help minimize handling noise while still remaining ergonomically comfortable and attractive.

VPS-20S

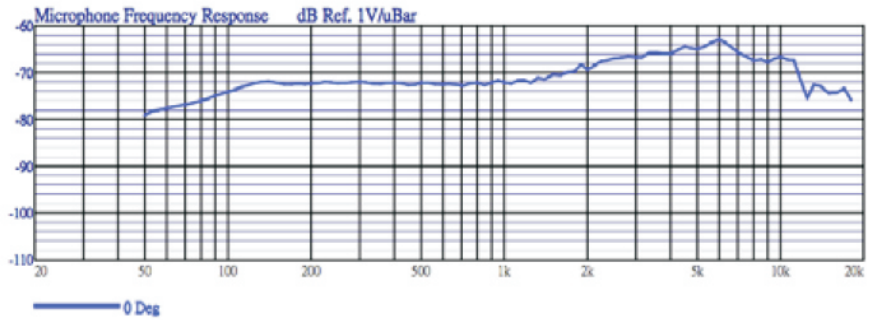

1153100007

SPECIFICATIONS

Freq Response - 50Hz - 15KHz

- Cardioid Pattern for exceptional gain before feedback
- Designed for clear vocals and reduced handling noise
- Engineered to be versatile and robust in live situations

Includes: Mic clip and 1/4 to XLR cable

VPS-60

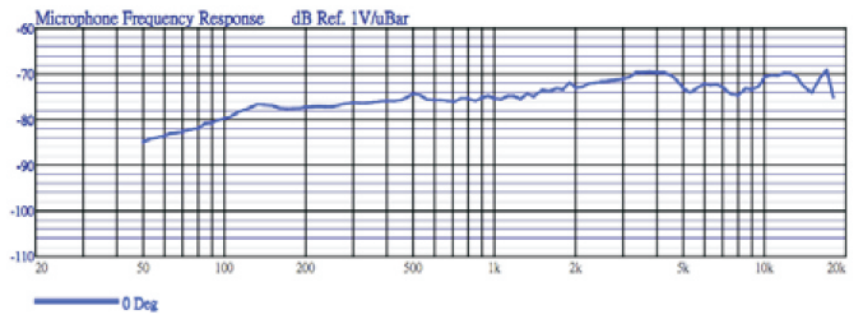

1153100006

SPECIFICATIONS

Freq Response - 50Hz - 18KHz

- Super Cardioid for superior gain before feedback
- Engineered to better control the proximity effect
- Minimizes handling noise without compromising sound quality

Includes: Mic clip, mic bag, XLR-XLR mic cable

VPS-80

1153100005

SPECIFICATIONS

Freq Response - 50Hz - 18KHz

- Super Cardioid for superior gain before feedback
- Ultra-smooth frequency response for great live or studio applications
- Floating capsule suspension for greatly reduced handling noise

Includes: Mic clip, mic bag, XLR-XLR mic cable
