

MINI POLLUX LED RGB 12Vac

The smallest light of the ACQUA + family is able to ensure all the light output as the 50W halogen lamp that serves your pool, relaxation area or small lanes. The practicality and robustness of the materials guarantee maximum reliability, while the patented structure makes it completely immune to any infiltration. It works at 12Vac with the electromagnetic transformers already present in the lighting system of your pool. Supplied with 3m or 10mt cable on request. Available as an accessory the control unit can simultaneously manage the RGB color change, preset with light scenes to be selected via radio control. Product designed and built in Italy.

Accessories:

RGB control unit with remote control
Transformer 220Vac / 12Vac 300W
Transformer 220Vac / 12Vac 100W

TECHNICAL SPECIFICATIONS	
Input voltage	12 - 15 Vac
Frequency	50-60 Hz
Electricity supply	0,75 A
Power consumption	9 W
Material	PMMA e ABS
Dimension	Ø 64mm h= 130mm
Weight	0,6 Kg
Electricity connection	cable 2x1,5mm neoprene H07RN8-F
Protection level	Ip68 - 3MT
Using temperature	-10 °C - +35°C
Insulating class	III class
Beam angle	Fascio largo 115°
Dimmerable	NO
Source	3 led alta luminosità CREE
Colour temperature	RGB
Total emission	600 lm
Brightness	126 lux
Impact resistance	Ik07 2.00 Joule
Installation advice	1 x 8 mq
